

FROZEN FIXTURE

frozen inputs

Gate cases

valid + named errors

Repair arms

K=0 / blind / rho / oracle

Faults

checksum / replay

Accounting

adapter + assignment

DETERMINISTIC

versioned exact counts

Manifest + hashes

IDs / config / state

Offline runner

proposal to outcome

Check operations

schema / continuity

Generated tables

raw count / exact ratio

INFERENCE BOUNDARY

OBSERVED

fixture agreement
state immutability
attempt accounting
guided/oracle split
named fault detection
mechanism conformance

supports

NOT MEASURED

live repair superiority
player or narrative benefit
affect efficacy
commercial performance
semantic completeness
authentication
