V5 DEVELOPMENT COLLECTION I 20 ASSIGNMENTS

Five synthetic fixtures x two signal conditions x two requested selectors; no pooled prior cohort.

10 schema failures; 1 accepted commit missed the goal. Response receipt is not task success.

G: goal reached: committed, fact present

A: gate accepted, goal missed

F: rejected, state unchanged

S: schema failure, no candidate

Row counts: P parsed / A gate accepted / G goal reached, each out of five assigned cases.

NR: served identity, provider request count, cost. Small development-only sample; no superiority claim.
